To whom it may concern,

I [The US Dept. of Energy must focus all its efforts on supporting the development of truly renewable energy sources such as wind and solar power.

With that said, I oppose the disposal of the nation's high-level nuclear waste at Yucca Mountain. I do not believe nuclear power as a safe or renewable energy source, nor do I believe the Yucca Mountain as a safe location for the storage of nuclear waste.

Until such a time as we have the wisdom to end the use of nuclear power, the least worst option (that I am aware of at this time) is On-Site Storage of nuclear waste as an alternative to Yucca Mountain.]

Thank you for reading my comments, and for your time.

Sincerely,
Jeff Toste
